

PROPOSED RULE MAKING

CR-102 (June 2004)

(Implements RCW 34.05.320)

Do **NOT** use for expedited rule making

Agency: Department of Ecology AO # 04-09

- ☒ Preproposal Statement of Inquiry was filed as WSR 04-11-038 ; or
☐ Expedited Rule Making--Proposed notice was filed as WSR _____ ; or
☐ Proposal is exempt under RCW 34.05.310(4).

- ☒ Original Notice
☐ Supplemental Notice to WSR _____
☐ Continuance of WSR _____

Title of rule and other identifying information:

The rule making will establish a state water management program for the Columbia River. It includes proposing Chapter 173-565 WAC Columbia River Mainstem water Management Program, and amending chapters 173-531A WAC The Water Resources Program for the John Day-McNary Pools Reach of the Columbia River and chapter 173-563 WAC The Instream Resources Protection Program for the Main Stem Columbia River in Washington State.

Date of intended adoption: May 20, 2005(Note: This is **NOT** the effective date)**Purpose of the proposal and its anticipated effects, including any changes in existing rules:**

The rule making will establish a state water management program for the Columbia River. It includes proposing Chapter 173-565 WAC Columbia River Mainstem water Management Program, and amending chapters 173-531A WAC The Water Resources Program for the John Day-McNary Pools Reach of the Columbia River and chapter 173-563 WAC The Instream Resources Protection Program for the Main Stem Columbia River in Washington State.

Reasons supporting proposal:

There are currently a large number of pending applications in Washington for new water rights from the Columbia River, and the demand for water is expected to grow over time as population and economic activity increase. At the same time, the endangered status of fish populations living in the river requires careful consideration of the effects off-stream water use. The department has twice been petitioned to initiate rule making for the Columbia River: first to close the river and its tributaries in Washington to further appropriation; and, subsequently, to require the department to process existing water right applications. In light of these conflicting petitions and recognizing that rule making is necessary to re-establish a stable footing for implementation of state policy, there is a compelling need for a rule governing a state water management program for the river. The proposed rule is intended to protect a healthy ecosystem while allowing for additional development to occur.

Statutory authority for adoption: RCW 90.03; RCW 90.22; RCW 90.54; RCW 43.21A; RCW 43.27A; and proposed policy bill: Management of water resources for the mainstem of the Columbia River.

Statute being implemented: RCW 90.03; RCW 90.22; RCW 90.54; RCW 43.21A; RCW 43.27A; and proposed policy bill: Management of water resources for the mainstem of the Columbia River.

Agency comments or recommendations, if any, as to statutory language, implementation, enforcement, and fiscal matters:

The proposed rule is part of a package proposed by Governor Locke designed to institute a new mainstem water resources management program for the Columbia River. The rule language, as proposed, assumes the enactment of executive request legislation by the 2005 Session of the Legislature. It also assumes that funding is provided to implement the new program.

Given the importance of the issues under discussion, the department will not adopt the proposed rule prior to receiving direction from the next Governor and the Legislature regarding the state's policies guiding a management regime for the Columbia River.
